	TOTALS:	10	14	389	392	49	6-8	6-8	5-6	9-12	3-4

Washington (4-3) and Dallas (4-3) eliminated because Arizona had better Conference Record (4-2) and Atlanta (4-3) ELIMINATED BECAUSE Detroit (4-3) beat them head-to-head and Arizona had the best Conference Record of all the teams remaining also beat Detroit in game #1 of season. And both Tampa Bay and Detroit beat Atlanta but lost to Minnesota and they were both 1-0 vs. AFC competition. JUSTIFICATION: Detroit beat Chicago 14-10, and Tampa Bay lost to them 20-14, which gives the Detroit Lions the edge to get into playoffs for the 4th consecutive season and they have 3 NFC Championship games under their belt.

Any team who makes the playoffs or Super Bowl cannot be rebuilt for the following season.

X Clinched Division Title

Defensive Player of the Year

Offensive Player of the Year

A Review:

August 17, 2018 … The May 2018-19 DRAFT … Goes only to teams who did not make the playoffs the previous year by choosing from a new pool of 80 TTC and

Rookie player bases. Great players like Jerry Rice, Dave Casper, and Marcell Dureus, who led Buffalo to a Super Bowl emerged from the new pool of player bases. As a rule, now, any team that made the playoffs must wait one season to make any personnel changes. This will ensure that the league remains fiercely competitive and at its best and that all 32 teams have a fighting chance of bringing their team to its very best level of competition for each game. The excitement is real! Every team schedule feels like a war because the league is stacked with legitimate awesome players with every team having stars. Miami, once the most dominant team in this EFL, oddly, has had the most difficulty rebuilding at (8-19) since 2008. Many of the lineman have turned been now turned into running back player bases around the league. They serve as reliable offensive powerhouse running backs around the league for other teams. The disappointment IS also REAL for some rebuilt. Look at Cleveland who we thought could contend for an AFC title, and who had shut down most of its opponents with the best defense in the NFL during the regular season allowing only 59 points, a seven-game season defensive record until Buffalo crushed them 42-14 in the playoffs!

Jacksonville's Freddie Taylor is on the verge of taking his team to the playoffs and the Colts, Titans, Packers, and Rams are trending. This new formula made the league brilliant for the past two seasons as teams--who in their history, never made the playoffs, went to the Super Bowl and even won. It gives teams like the Eagles great prospect. Keith Byars just needs a powerhouse line to break records. Buffalo serves as the best example of this draft method, and boy were they great in 2017 dominating the competition out of literally nowhere! Carolina is another team on track to do great things after securing a strong draft of new players. In 2018, new powerhouse teams have emerged. Carolina was (0-7) in 2017, and they are now one of the best teams in an already very tough NFC. The league has a real NFL feeling making the once predictable 1-3 team, unpredictable on any given day.
